BRONZE COPPER

EASTERN TAILED-BLUE

HARVESTER

JUNIPER HAIRSTREAK

NORTHERN METALMARK

CABBAGE WHITE

CHECKERED WHITE

CLOUDED SULFUR

CLOUDLESS SULFUR

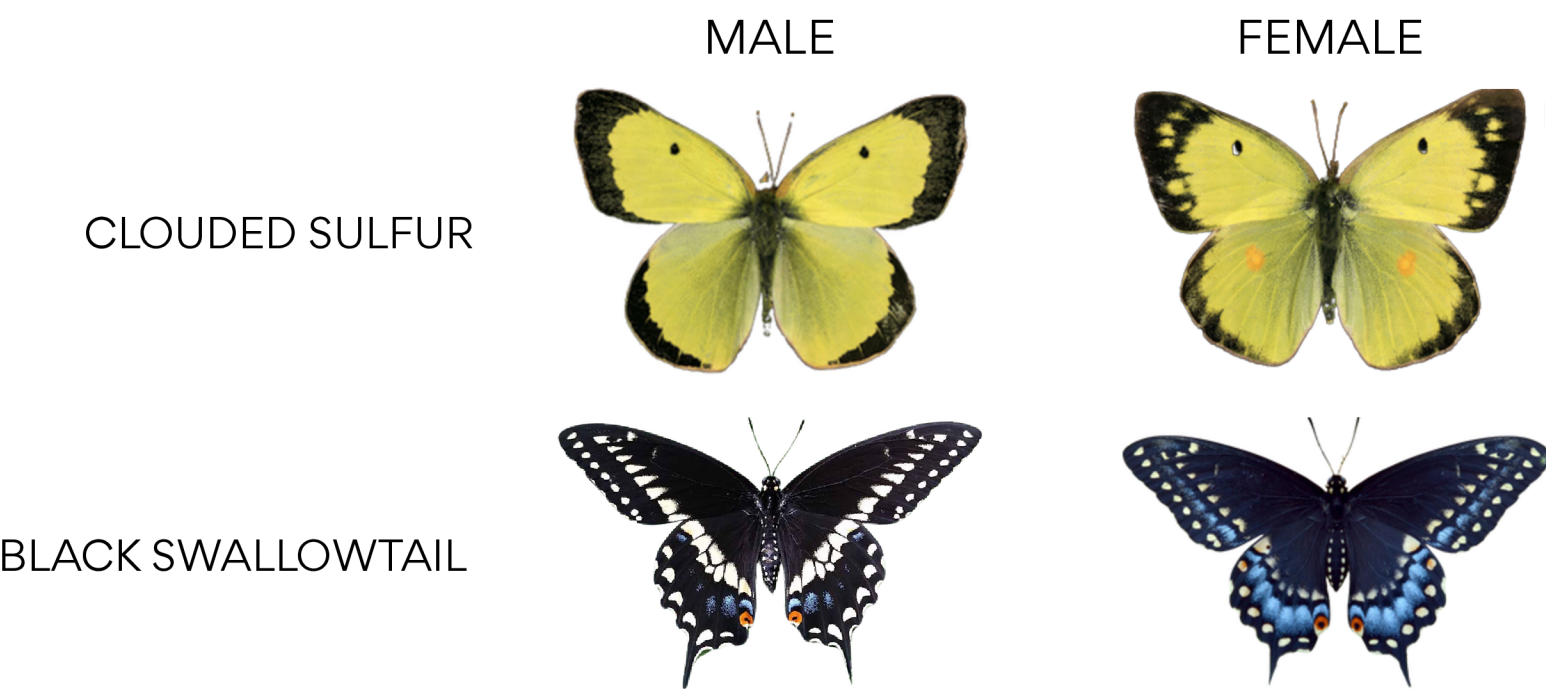

ORANGE SULFUR

## Butterflies come in a variety of shapes, sizes, colors, and patterns

These features can help camouflage (hide) butterflies from predators and also help them recognize members of their own species.

### ATTRACTION

Bright colors and patterns help males and females find each other.

### DECEPTION

Some wings mimic the shapes of large eyes. Can you find these “eyespots” on other butterflies?

### INVISIBILITY

Colors sometimes help butterflies to disappear. What environment would be best for these butterflies to live in?

### WARNING

A few butterflies taste really bad. Predators remember bold colors and avoid them.
